Dell Inc., as the equipment's responsible party for electromagnetic compatibility (EMC) regulatory compliance for Canada, declares that the Information Technology Equipment (ITE) described by the object of this suppliers declaration or conformity complies with:

- ISED Inference-Causing Equipment Standard ICES-003, Issue 7

We attest that we have verified that compliance has been demonstrated and the results documented in an EMC test report and that the report does clearly state compliance with the above ICES-003 standard and details which test method was employed to determine compliance.

OBJECT OF THE SUPPLIERS DECLARATION OF CONFORMITY

Type of Equipment.....	Flat Panel Monitor
Regulatory Model.....	P3424WEBt
Regulatory Type or Reference Number.....	N/A
Trade/Brand Name (make).....	DELL

This equipment has been tested and found to comply with the limits for a **Class B** digital device for both conducted and radiated emissions, pursuant to ICES-003 Issue 7. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the antenna of the radio/television receiver.
- Increase the separation between this equipment and the radio/television receiver.
- Plug the equipment into a different outlet so that the equipment and the radio/television receiver are on different power mains branch circuits.
- Consult a representative of the responsible party or an experienced radio/television technician for additional suggestions.

The responsible party recommends use of add-in devices (cards, drives) and connected external I/O peripherals that are Class B to reasonably ensure this equipment remains suitable for use in a residential environment. This equipment was tested in a typical configuration.

This equipment's unique regulatory compliance identification is provided by the Regulatory Model and/or Regulatory Type. These regulatory compliance identification markings are on the regulatory label affixed to your equipment and should not be confused with marketing name or model of the equipment. To facilitate positive identification, request for regulatory compliance information for this equipment should include the Regulatory Model and/or Regulatory Type. This equipment may be marketed under one or more of the makes and/or marketing names/models of the wholly owned Dell Inc. subsidiaries and brands.
